

Name of Practice: VOLUNTARY BUFFER STRIP CROPPING
DCR Specifications for No. VSL-3B

This document specifies terms and conditions for the Department of Conservation and Recreation's voluntary buffer strip cropping best management practice that are applicable to all contracts entered into with respect to that practice.

A. Description and Purpose

A series of narrow permanent protective strips of sod alternating with wider strips of row or close growing crops implemented to reduce erosion and surface runoff and improve surface water quality.

B. Policies and Specifications

1. This practice is subject to NRCS Standard 332 Contour Buffer Strips.
2. Soil loss rates must be computed for all applications.
3. The practice must not be in lifespan from any other conservation program.
4. All practice components implemented should be maintained for a minimum of 5 years following the calendar year of installation. The lifespan begins on Jan. 1 of the calendar year following the year of certification of completion. This practice is subject to spot check by the SWCD throughout the lifespan of the practice.

C. Technical Responsibility

Technical and administrative responsibility is assigned to qualified technical DCR and SWCD staff in consultation, where appropriate and based on the controlling standard, with DCR, Virginia Certified Nutrient Management Planner(s), NRCS, DOF, and VCE. Individuals certifying technical need and technical practice installation shall have appropriate certifications as identified above, and/or Engineering Job Approval Authority (EJAA), for the designed and installed component(s). All practices are subject to spot check procedures and any other quality control measures.
